DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 24-40, drawn to a method for non-contact measurement, classified in class 324, subclass 662.
- II. Claims 18-23, drawn to structure for a non-contact capacitive sensor, classified in class 324, subclass 688.

The inventions are distinct, each from the other because:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a wall thickness detector. See MPEP § 806.05(d).

A telephone call was made to Jeffry Nelson (Reg. 30,481) on November 11, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
